dialogue that inspires a more sustainable, equitable,
and creative urban environment.*

Boston like you've never seen it before!

Common Boston is an annual, multi-day festival curated by an all-volunteer committee of the Boston Society of Architects. For the past six years, Common Boston has brought together individuals and organizations from across the design spectrum to build valuable community relationships and a more vibrant urban environment. Lecture series, open studios, exhibitions, workshops, competitions, and tours have each celebrated the role design plays in our neighborhoods. Ultimately, the Common Boston festival aims to create opportunities for networking, dialogue, and discovery of both Boston and its cultural assets.
